National Aeronautics and Space Administration.
CONTROL OF GAS-TURBINE AND RAMJET ENGINES. L. A. Zalmanzon and B. A. Cherkasov. (Translation of publication by the Government Defense Industry Press (Moscow), 1956.) July 1961.
ii, 257p. OTS price, $4.00.
(NASA TECHNICAL TRANSLATION F-41)

Attention is concentrated on describing the physical bases of the processes of engine control and an exposition of the methods of experimental study and design of control apparatus. A series of examples bring out the close connection between the operation of the elements in the control loop and the fuel supply system of the engines. The characteristics of the several elements of the fuel apparatus are given. The book is written as a textbook for students in aviation institutes, but may also be useful for workers specializing in the field of aviation engines.

Zalogin, N. G.
ON PROTECTING THE ATMOSPHERIC AIR AGAINST POLLUTION BY THE FLUE GASES OF LARGE POWER STATIONS. Jan 61 [7]p. 4 refs. RTS 1663. Order from LC or SLA mi$1.80, ph$1.80 61-15714

Trans. of Teploenergetika (USSR) 1960 [v. 7] no. 4, p. 18-24.

A comparative evaluation is made of the ash and sulphur content of the power station fuels of the U. S. S. R. The existing industrial sanitation norms for the cleanness of the atmospheric air are examined. An appraisal is made of the economic practicality of cl cleaning flue gases of sulphur dioxide by means of sulphur extraction plant, and of the dispersal of flue gases in the atmosphere with the aid of tall chimneys. Zalogin, N. G., Keneman, R. Ye., and Vorob'yev, V. N.
REGARDING THE MECHANISM OF FREE FLOW OF NON-AGGLOMERATING SOLIDS. Feb 61 [7]p. 7 refs. RTS 1653.
Order from LC or SLA mi$1.80, ph$1.80 61-15923

Trans. of Inzhenerno-Fizicheskiy Zhurnal (USSR) 1960, v. 3, no. 4, p. 18-22.

As a result of investigations into the relationship between the rate of flow of solid particles out of funnels and the angle of inclination of funnel walls to the horizontal, it was found that only the inclination of the part of the wall close to the outlet orifice affects the rate of flow. It was established that the flow from a funnel becomes greater than that from a flat-bottomed bin when the inclination of the funnel wall exceeds 55-60°. The walls of a cylindrical bin influence the rate of flow if their distance from the edge of orifice is less than the diameter of the orifice. (Authors) (See also 61-15713)
